■ SPECIFICATIONS

Radio section

Tuning system: PLL Frequency synthesizer system

Receive range: FM 87.5MHz to 108.0MHz

MW 531kHz to 1,602kHz

LW 153kHz to 279kHz

Intermediate frequency:

FM 10.7MHz

MW/LW 450kHz

Quieting sensitivity: FM Less than 15dB μ (30dB S/N)

MW Less than 34dB μ (20dB S/N)

LW Less than 41dB μ (20dB S/N)

Separation: FM More than 18dB

Auto tuning stop sensitivity:

FM(DX) 25 \pm 8dB μ

(LO) 45 \pm 10dB μ

MW(DX) 30 \pm 10dB μ

(LO) 60 \pm 10dB μ

LW(DX) 30 \pm 10dB μ

(LO) 62 \pm 10dB μ

Tape section

Reproducing system:

4 track 2 program

2 channel stereo system

Wow and flutter: Less than 0.25%(W.R.M.S)

Separation: More than 35dB

Cross talk: More than 40dB

S/N ratio: More than 45dB

FF/REW time: 180sec.(C-60)

General

Load impedance: 4 Ω /ch

Output power: 8W \times 4(Max.)

Power supply voltage:

DC13.5V(10.8V to 15.6V)

Negative ground

Consumptive current:

Less than 10A

Dimensions(mm): 178(W) \times 50(H) \times 180(D)

Weight(kg): 1.3

※ Specifications and design are subject to change without notice for further improvement.

■ COMPONENTS

PU-1570A-A / B-A / C-A

Main unit

■ To engineers in charge of repair or inspection of our products.

Before repair or inspection, make sure to follow the instructions so that customers and Engineers in charge of repair or inspection can avoid suffering any risk or injury.

1. Use specified parts.

The system uses parts with special safety features against fire and voltage. Use only parts with equivalent characteristics when replacing them.

The use of unspecified parts shall be regarded as remodeling for which we shall not be liable. The onus of product liability (PL) shall not be our responsibility in cases where an accident or failure is as a result of unspecified parts being used.

2. Place the parts and wiring back in their original positions after replacement or re-wiring.

For proper circuit construction, use of insulation tubes, bonding, gaps to PWB, etc, is involved. The wiring connection and routing to the PWB are specially planned using clamps to keep away from heated and high voltage parts. Ensure that they are placed back in their original positions after repair or inspection.

If extended damage is caused due to negligence during repair, the legal responsibility shall be with the repairing company.

3. Check for safety after repair.

Check that the screws, parts and wires are put back securely in their original position after repair. Ensure for safety reasons there is no possibility of secondary problems around the repaired spots.

If extended damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.

4. Caution in removal and making wiring connection to the parts for the automobile.

Disconnect the battery terminal after turning the ignition key off. If wrong wiring connections are made with the battery connected, a short circuit and/or fire may occur. If extensive damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.

5. Cautions regarding chips.

Do not reuse removed chips even when no abnormality is observed in their appearance. Always replace them with new ones. (The chip parts include resistors, capacitors, diodes, transistors, etc). The negative pole of tantalum capacitors is highly susceptible to heat, so use special care when replacing them and check the operation afterwards.

6. Cautions in handling flexible PWB

Before working with a soldering iron, make sure that the iron tip temperature is around 270°C. Take care not to apply the iron tip repeatedly (more than three times) to the same patterns. Also take care not to apply the tip with force.

7. Turn the unit OFF during disassembly and parts replacement. Recheck all work before you apply power to the unit.

■ COMPUTER ANTI-THEFT SYSTEM

This unit has a built-in Computer Anti-Theft System (CATS) which makes the radio inoperative if power to the unit is interrupted for any reason whatsoever (including disconnection and reconnection of the car battery). The radio will remain inoperative unless you enter the correct CATS number.

RELEASE the CATS

1. Press the power button to turn the power on.
2. "CODE IN" appear on the display.
3. Enter the code number using the preset buttons.
4. If the entered code number is correct, the radio turns on. A radio frequency appears on the display.

5. If the entered code number is incorrect, the numbers on the display and nothing happens.

6. To enter the code number again, press and hold down the band button for at least 3 seconds. "CODE IN" reappears on the display. Enter the correct code number.

7. If you enter an incorrect code number three times in succession, the system will not accept another code input for one hour, even if you press the band button for more than 3 seconds. If at the end of that hour you enter an incorrect code number again, you will have to wait another hour to try once more and so on.

■ ADJUSTMENTS

Item	Procedure	Measuring instrument
FM S-meter	1. Press the RDS button and M6 button to RDS test mode. 2. Input a 98.1MHz/30dB μ (400Hz, 30% mod) signal of RDS test mode. 3. Adjust VR1 of tuner pack so that an output of TP908 is $3.0 \pm 0.1V$.	SSG Milli volt meter
FM Noise convergence	1. Input a 98.1MHz/55dB μ (400Hz, 30% mod) signal. 2. Set an output level to 0dB (=775mV) with main volume. 3. Adjust VR101 so that the output is $-25 \pm 1dB$ when SSG output is set $-20dB \mu$.	SSG Milli volt meter

EXPLANATION OF IC

μPD178006GC-514-3B9

052-1140-00

System controller

Outward Form

80 pins, plastic QFP

Terminal Description

No.	Symbol	I/O	Function
1	REMOCON	I	Remote controller input
2	S-METER	I	FM signal meter input
3	NOISE	I	FM noise input
4	RDS-MUTE	O	FM muting signal output
5	N.C.	O	Not in use
6	A-MUTE	O	Audio power IC muting signal output
7	LCD SI	I	Serial data communication line with LCD driver IC
8	LCD SO	O	
9	LCD CLK	O	
10	LCD CE	O	
11	N.C.	O	Not in use
12	C-BUS SO	O	C-BUS line
13	C-BUS SI	I	
14	C-BUS CLK	O	
15	NOISE CL	O	Output terminal to discharge the condenser in the FM noise detecting circuit, to eliminate noise. "H": eliminate noise, "L": ready to detect noise
16	N.C.	O	Not in use
17	IF REQ	O	IF count request signal output
18	FM SD	I	FM station detect signal input
19	AM SD	I	AM station detect signal input
20	N.C.	I	Not in use
21	GND	-	Ground terminal
22	VDD	-	Electric power terminal
23	CATS INIT	I	Initialize signal input for CATS-EEPROM
24	INIT 1	I	Initially established signal input
25	INIT 2	I	
26	TEST	I	Not in use
27	N.C.	I	Not in use
28	N.C.	I	
29	N.C.	I	
30	VDD-PLL	-	Power terminal for PLL
31	N.C.	I	Not in use
32	N.C.	I	
33	GND-PLL	-	Ground terminal for PLL
34	EO 0	O	Not in use
35	EO 1	O	
36	IC	-	Connected to ground
37	PLL LOCK	O	Indicates that PLL is locked. "H": locked
38	PI READ	O	Indicates that PI data reading has completed.
39	PLL CE	O	Serial data communication line with PLL IC (LC72146)
40	PLL DI	I	
41	PLL DO	O	
42	PLLCLK	O	
43	N.C.	I	Not in use
44	N.C.	I	
45	FM DX/LO	O	"L": local
46	AM DX/LO	O	"H": local
47	CATS IND	O	Outputs signal to blink CATS indicator
48	RDS +B	O	Outputs RDS power supply control signal
49	C-BUS SRQ	I	Inputs C-BUS slave request signal
50	TEL MUTE	I	Inputs telephone detect signal
51	EEP-ROM CE	O	Serial data communication line with CATS EEPROM (NM93C46)
52	EEP-ROM DI	I	
53	EEP-ROM DO	O	
54	EEP-ROM CLK	O	

No.	Symbol	I/O	Function
55	N.C.	O	Not in use
56	P+14V	O	Outputs 14V power supply control signal
57	P+5V	O	Outputs 5V power supply control signal
58	FWD/REV	I	"L": forward, "H": reverse
59	BEEP	O	Beep signal output (3kHz)
60	FF/REW	I	"L": fast forward, "H": rewind
61	MECH ON	O	"H": turns on tape mechanism motor
62	PACH IN	I	"L": tape in, "H": tape out
63	APC	O	Outputs "H" when the system is ready to operate APC.
64	MTL	O	"H": metal tape
65	DOLBY	O	"H": Dolby ON
66	RDS DATA	I	RDS data input
67	RDS CLK	I	RDS clock input
68	B/U DET	I	"H": backup ON
69	ACC DET	I	"H": ACC ON
70	LCD SI INT	I	Terminal to input interruption signal to shift to operation mode when key is pressed in Stop mode. Connects to LCD-Si.
71	CATS IN	I	"L": ISO connector not connected
72	VOL. DATA	O	Serial data communication line to volume IC (M62419)
73	VOL. CLK	O	
74	CPU REG	-	Connected to GND through a capacitor
75	GND	-	Ground
76	X 2	-	Crystal connecting terminal
77	X 1	I	
78	OSC REG	-	Connected to GND through a capacitor
79	VDD	-	Power terminal
80	RESET	I	Reset signal input
